

Side By Side™

Side By Side is a delightful, nonfiction series for children and grownups to read together. Each page in these books is clearly coded with two kinds of text: simple, predictable text for beginner readers, and more difficult text with important vocabulary and content for grownups to read aloud. The incredible photography and fascinating facts will amaze young children and adults alike. So go find a cozy place to curl up, and enjoy taking turns reading—side by side!

Release Date: August 19, 2019

Pub Date: September 1, 2019

\$26.00 (Reinforced Library Binding)

Grade: K

Age: 5

24 pages, full-color photographs

Trim: 10 x 8

Side By Side™

Previously Published Titles

“Drawing on a high-interest topic (slime!), this entry in the Side by Side series (4 titles) fosters reading development and scientific knowledge. The content is divided into three sections of slime producers: animals, plants, and people. The text itself is also divided into two sections. Along the top of each page is a simple sentence—such as, “This animal makes slime”—in a large font for beginning readers to try on their own. Adults or proficient student reading buddies then read the more detailed information in a smaller font. High-quality photographs with up-close images of a giraffe’s tongue and other slime in action keep readers of all ages engaged. Occasional inset photos and a concluding picture glossary help explain more challenging vocabulary and concepts. **A terrific way to bridge reading and science.**”

Pub Date: September 1, 2019

\$29.00 (Reinforced Library Binding)

Grade Range: 2–3

Age Range: 7–8

32 pages, full-color illustrations

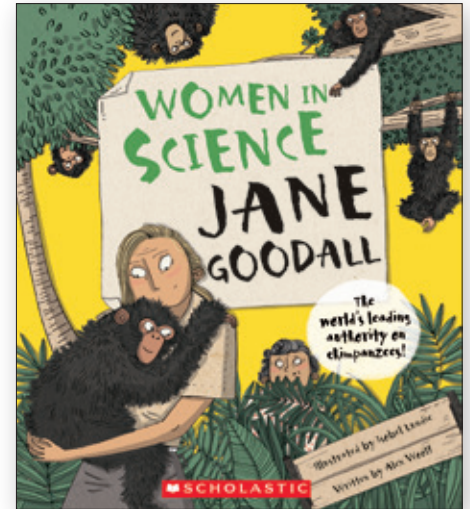

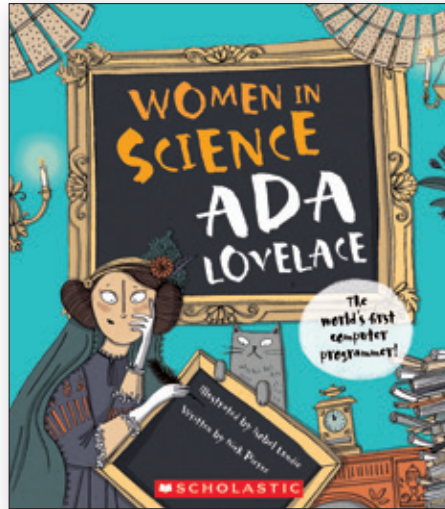

Trim: 8 1/2 x 9 1/2

Copyright 2020 / Franklin Watts®

Features:

- **Bite-sized text** introducing concepts in **STEAM** curriculum in an accessible manner
- **Highly-illustrated** with original artwork and photographs
- **STEAM** concepts related to the scientists' work are described with diagrams and info graphics
- **Timeline** of the scientist's life and the historical context for their work
- **Map** of important locations in the subject's life
- A helpful **glossary** and **index** in each book

The titles in the new *Women in Science* series take a highly visual approach to telling the stories of important women scientists. Each title features bite-sized text telling the story of a scientist's life, groundbreaking work, and legacy in an engaging and accessible way, illustrated with original artwork and photographs. There are multiple entry points, including timelines, maps, and captions. The engaging text and vibrant illustrations will appeal to all readers and introduce them to STEAM concepts related to the scientists' work.

Nature's Children™

Previously Published Titles

“An updated take on “Nature’s Children” with new authors, new text, and, with just a few exceptions, different photographs. In each book, a “Fact File” spread introduces the animal group, leading into a cogent, well-organized treatment of physical features, behavior, and life cycles. A balanced combination of general content and specific examples works effectively, with data relevant to individual species clearly noted. Later chapters touch on history and related species. All of these animals are vulnerable or threatened; a closing chapter looks at survival challenges and includes examples of recent and current rescue efforts. Most photographs are single images, about a full page in size, which complement the text well, sometimes expanding the information with captions. **VERDICT First-rate animal profiles for upper grade elementary students.**”

A True Book™

Previously Published Subsets

“The latest in alternative, renewable energy sources is covered in an appealing package. Each entry opens with a set of two true or false questions, encouraging readers to test their knowledge before reading. The answers to these questions appear in the back of the book, alongside a review of the whole volume’s content and comprehension questions. The conversational writing and engaging format encourage active learning. Colorful photos, historical time lines, and detailed diagrams put the material in context. Plenty of white space, with text boxes overlaid on pictures, keeps the text legible. “The Big Truth” sections present pros and cons or highlight innovations, such as the proposed IceLink connecting Iceland’s geothermal energy sources to the United Kingdom. **VERDICT Enticing visuals and a forward-thinking perspective make this series an excellent choice for library collections.**”

“Take a trip through the U.S. with these cheerful texts that highlight the appealing and special qualities of each state. The books mix short chapters of straightforward, informative text with bright, busy pages of special features throughout the volume as well as in the back matter....Each book’s chapters focus on the state’s (or district’s) land and wildlife, government at various levels, history, and notable cultural institutions. Native peoples are mentioned in the history section although often only in passing. Large captioned photographs of key locations and people illustrate nearly every page. Each book also includes a variety of graphic features, from maps to a time line, a population graph, and a diagram showing the state’s electoral votes. **These books in the True Book: My United States series are ideal for beginning research or just learning more about the country.**

—Booklist on Connecticut, Nevada, Oklahoma, and Washington, D.C.
